Aki Endüstri (Aki Industry) is an enterprise operating on compressed air machines, gas systems service and product sales. Furthermore, with a fast-developing specialist workforce in its sector, it is a solution-oriented firm. Our organization provides a wide range of solutions in the areas of GENERATOR, COMPRESSOR, AIR TOOLS, AUTOMATION, and INSTALLATION PROCESS.

While Aki Endüstri produces solutions for your GENERATOR, COMPRESSOR, AIR TOOLS, AUTOMATION, INSTALLATION OPERATIONS, it works with the leading brands of our country and the world. It sells and services of domestic and foreign brand product groups in line with the needs and demands of our customers.

GENERATOR

We have FMT Group Turkey Representatives. As AKİ Endüstri - FMT GROUP, in line with our experience and vision over a quarter of a century, the energy requirements required by the sector and our business partners, with the “understanding of quality and uninterrupted service” we continue to welcome. Since 2001, we have been producing our 10,000 m² factory equipped with high technology in Tirana, the capital of Albania. In addition to “Diesel Generator” solutions between 12 to 3500 kVA, which is our main production item; we continue to provide uninterrupted support to our business partners with "Gas Generators", "Hybrid Generator Systems" and "Synchronized Generator Solutions". In addition to our generator systems, we are able to respond to all kinds of energy needs with our "Voltage Regulator" (2 to 3500 kVA), "UPS (Uninterrupted Power Supplies)" and "Medium-High Power Transformer" solutions. As FMT GROUP, we continue to provide our customers with the quality solution and uninterrupted service they deserve 24/7 in more than 35 countries of the world as a result of direct and indirect sales.

Our company has ISO 9001:2015, OHSAS 18001:2007 and ISO 14001:2015 quality certificates and continues to produce within ethical values and environmental awareness. Our biggest purpose is to meet the needs of the market with optimum price and high product quality as a result of our uninterrupted R&D activities, and to strengthen our place among the world's known brands by improving our brand day by day.

COMPRESSOR AND EQUIPMENT

Producing safe compressors is a top priority for Dalgakiran. Dalgakiran's research and development work on compressor safety considers both active and passive safety. These research, which begin with human behavior analysis and progress to technology development, aim to improve the human-machine interface relationship. As a result, a safe operation is ensured. What's more, new model prototypes must pass rigorous safety tests before the compressor is approved to begin production. Having all CE Certificates, Dalgakiran products are subjected to electrical safety tests such as LV (Low Voltage) and EMC (Electromagnetic Compatibility) together with the Machinery Directive in accordance with this certificate.

Dalgakiran has a proactive system that guides the development of the compressed air sector, owing to its capacity to produce at international standards, its ability to fulfill the sector's flexible market demands, and the emphasis and investments it places in R&D projects.

With the aim of making its products reliable, high quality, robust, efficient, and environmentally friendly, Dalgakiran aims at customer satisfaction in the light of the principle of continuous improvement with ISO 9001:2008, ISO 14001:2005, OHSAS 18001:2007 and ISO 27001:2013 audits within the scope of international standards.

Dalgakiran adopts an efficient and high-quality structure at every stage of production, keeps quality in the forefront with continuous improvement. In addition to eliminating waste with its lean production approach, it makes the production system respectful to nature and ensures that the customers of Dalgakiran products comply with the highest quality, reliability, and durability standards.

With its screw assembly, piston assembly, piston head manufacturing, pressure tank manufacturing line and sheet metal processing facility, automatic paint lines, machining facilities and production capacity established on a closed area of 25 thousand m², Dalgakiran is one of the companies with the largest integrated facilities in the compressed air sector that located in Turkey and its nearby geography.

Dalgakiran Production System was established on the principle of producing the demand as much as the need quickly with high standards of quality with just in time (JIT) production methodology and delivering it to the right place when requested. This understanding represents a radical break from traditional production systems that require large-scale inventories to produce as much as possible on production lines.

AIR TOOLS

Chicago Pneumatic has actually gone global since its inception in the United States in 1901. From assisting in the construction of many of America's landmarks to our current international presence, Chicago Pneumatic has always prioritized local service in order to expand our global reach. Today, you can find us wherever you operate!

At Chicago Pneumatic, our purpose is to provide best-in-class global services to our customers in the vehicle maintenance, industrial manufacturing, and construction industries, with a dedicated product portfolio and a robust network of approved distributors. We add added value to you by providing the best solutions to meet your needs with our many years of experience.

Our employees start each new day with the motivation to research, develop, produce, and present to your products that meet your current and future needs. No matter what industry you are in, we want you to improve your business. CP serves three main segments: production, upkeep, construction, and demolition. We offer a complete portfolio of quality-assured, durable products to meet the specific needs of these segments. Rigorous testing and quality inspections are implemented as standard in all CP engineering, manufacturing, delivery, and after-sales processes to ensure high performance at all times. Chicago Pneumatic Tools offers hundreds of air tools designed on a wide scale:

There are impact nut-runner, ratchets, air screwdrivers, drills, grinders and much more. The new Chicago Pneumatic Industrial Tools catalog also includes all types of hydraulic equipment for heavy bolting applications in the fuel, gas, petrochemical, wind power, power plants, mining, and construction industries.

Pneumatic tools (Pneumatic impact wrenches, Pneumatic torque wrenches, Pneumatic ratchet wrenches, Pneumatic screwdrivers, Pneumatic drills, Pneumatic grinding motors, Pneumatic sanding and polishing machines, Pneumatic abrasive tools, Special tools, Pneumatic cutting tools, Pneumatic riveting tools)

Air engine solutions

Workshop equipment (Lifting equipment, Wheel jacks, Workshop presses, Torque wrenches, Reinforcing devices)

We offer Wireless & Electrical appliances (Wireless impact nut-runners, Wireless torque wrenches, Wireless drills, Wireless grinders, Electric polishers, Air line network, Accessories and Hydraulic Bolting solutions.

HIGH PRESSURE WASHING MACHINES

INDUSTRIAL CLEANING PRODUCTS

Car washing machines are high-pressure water machines used in many fields today. Thanks to its strong water pressure, it facilitates cleaning works and significantly reduces the burden of businesses and individuals. Our ROTOWASH company is a Turkish company that produces 87.5% domestically. Customer satisfaction is always a priority and indispensable principle in ROTOWASH, which has a constantly rising momentum with the knowledge and experience of many years.

High-pressure water machines, generally known as car washes, are used in many sectors and areas today, apart from car wash companies. Because of its effectiveness in cleaning procedures, high pressure washing machines have become commonplace in many institutions and establishments. It offers higher performance, shorter cleaning time with less consumption.

In general, high-pressure washers are preferred for heavy car washes and large car washes

By using ROTOWASH high pressure washer:

- Poultry, house cleaning,
- Construction machinery cleaning,
- Sidewalk, road, etc. area cleaning,
- Garbage container cleaning,
- Incident and accident site cleaning,
- Equipment and machine cleaning,
- Workshop cleaning,
- External cleaning,
- Service workshop cleaning,
- Facade cleaning,
- Swimming pool cleaning,
- Sports facility cleaning,
- Production facilities cleaning

You can provide great benefits to your business and yourself in all of its transactions. Car wash machines are very efficient machines as long as they are used correctly. Thanks to our long-lasting and high-quality products, you can successfully carry out cleaning works for many years and benefit greatly from your operating costs.

You can take advantage of our company's original spare parts service at local service centers.

By using original spare part:

Ensure that the air compressor and its equipment are healthy and long-lasting, and do not experience inefficiencies due to the high total cost of poor quality and backstreet spare parts.

The original spare part is one of the indispensable elements for the healthy operation and longevity of the compressor.

Comprehensive original spare part and maintenance kits prepared according to service hours allow you to perform easy scheduled and trouble-free maintenance; the use of original spare parts guarantees continuous operation, long life, and energy savings.

SPARE PART

In general, the spare parts of screw compressors can be listed as follows:

- Separator
- Oil Filter
- Air Filter
- Panel Filter
- Suction Valve
- Screw Group (Oil Seal, Bearing Kit)
- Strap
- Control Panel
- Pressure Sensor
- Temperature Sensor
- Coupling
- Gear
